MEMORANDUM FOR: Deputy Director for Administration
FROM: Harry E. Fitzwater
Director of Personnel
SUBJECT: Office of Personnel Weekly Report --
Week Ending 17 October 1979

1. Recruitment Activity:

a. Twenty-five Student Trainee candidates were interviewed at Rensselaer Polytechnic (RPI) Institute on 2 and 3 October 1979. RPI has an excellent reputation in academic circles, and the overall quality of the interviewees was superb. Eighteen candidates, including four minorities (two women, one black, and one Hispanic), were requested to submit applications. (U)

discuss the Office of Data Processing's (ODP) interest in mounting a recruiting campaign for systems programmers in the near future. In essence, ODP wants to use their professional contacts on various campuses to locate applicants. Therefore, arrangements will be made at selected universities for ODP personnel to address computer science students and solicit their applications for Agency employment. Whenever possible, a recruiter will accompany the ODP representatives. ODP will provide us with a schedule of planned visits which will, in turn, be provided to the recruiters. At schools where ODP has no direct contacts, the recruiters will be asked to arrange the ODP visits. ODP is also compiling a recruitment pamphlet/brochure designed to attract computer scientists (we proposed this idea to them at the September 1978 Recruiters Conference). The ODP brochure will be coordinated for approval with the Recruitment Advertising Committee. (U)

10. Vacancy Notices - SES: Vacancy Notice books for the Senior Executive Service (SES) have been placed in the library (main circulation desk) and in 836 Ames Building. Reports indicate that several employees have stopped by to review the books since [redacted] was issued on 26 September 1979. Content is still relatively sparse - as of 16 October 1979 only six current notices were available for review. The Office of Personnel Management indicates that the SES, especially the distribution of notices, is still in a formative stage and that volume will undoubtedly increase. (U)
